Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 112

Claims 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10, line 2, "wind means" lacks antecedent basis.

Claim 11, line 1, "said wing means" lacks antecedent basis.

Claim 12, line 2, "said wings means" lacks antecedent basis.

Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification failed to particularly point out the structure components of the "means for retaining said streamers and said attachment means together prior to use of said apparatus" as set forth therein.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8, 13, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watkins U.S. Patent 5,354,227 in view of Schofield U.S. Patent 503,387.

Watkins disclosed in Fig. 1 a conventional streamer (10); a launch strip (16) is composed of a variety of materials such as paper, tissue paper, Mylar or the like (see column 1, lines 59-68). It is noted that Watkins failed to teach attachment means for attaching the streamer to the hand of the user as set forth in these claims. However, Schofield disclosed a toy as shown in Fig. 1 having means (b') for attaching the toy (B) to the hand of the user. Means (b') includes a ring member of size and shape such as to receive a finger of the user (page 1, lines 36-37) and it designed to the toy (B) into the air by a user. Therefore, it would have been obvious to one of ordinary skill in the art to modify the streamer of Watkins with the attachment means as taught by Schofield for the purpose of providing the user more control of the streamer during launching as well as retracting the streamer.

Regarding claims 4, 5, and 13, it is noted Watkins failed to specifically disclose more than one streamer and formed in a row as set forth therein. However, such difference is merely a multiplication of the same part. Accordingly, it would have been a matter of design choice to modify the streamer of Watkins with more than one streamer more than one row for the purpose of increasing the amount of streamer being launched into the air.
